WAR ON CONSUMPTION

ENSONIZER INHALATION TREATMENT DESTROYS THE GERMS

WITHOUT DRUGGING THE STOMACH.

ASTHMA, BRONCHITIS AND CATARRH

In reading of the Russian-Japanese war, which has just been ended, one thing with the structure of the property of the property of the property of the property of the property, and a property, but surely, that for them the during the substitutes occurs until the warried body gives with the form of the surely that is savely been the owner, when it is not cheerfully and gladly accord to the owner, which it has pursued as a surely in the form of the surely but surely, and any figure to give the surely been and the form of the surely been the owner, when the first owner, but the surely been the owner, but the surely but t many homes has consumption desolated:
The father, the bread-winner, taken away, and the widow left to feed and educate her her helpiess babes. Or the mother tori from her children at the time when they most need her care, and forced to leave them to the chances of careless servants or distant relatives. How many strong need have watched in agony the gradual fading away of their loved onces, helpies to stem the rising tide of the discent that is beauting them away forces: It is an abscess on the lung, and they said the consumption where the consumptive herson, and the physiciani verdict, "You have consumption," was like the toiling of a death kneil. The flushed cheeks and hollow cough of the consumptive, his watted frame and gittering eyes, accited the pity and dread of all who aw him. Every one felt, There goes a dead man." Change of climate was the only remedy ever suggested by the medical profession, and thousands of graves in Colorado and New Mexico testing the destructive process has been the consumptive, his watted frame and gittering eyes, accited the pity and dread of all who aw him. Every one felt, There goes a dead man." Change of climate was the only remedy ever suggested by the medical profession, and thousands of graves in Colorado and New Mexico testings the destructive process has been the consumption has not taken toll, and they are suggested by the medical profession, and thousands of graves in Colorado and New Mexico testings the destructive process has been the consumption has not taken toll, and they are suggested by the medical profession, and thousands of graves in Colorado and New Mexico testings the destructive process has been in Colorado and New Mexico testing the destructive process has been checked, but not cured, remain in exile, hundredo of miles from the homes they long fac, but dare not visit. There is scarcely a home in this broad land from which consumption has not taken toll, and they are destructive process has been the consumption and colorado and New Mexico testing fine the

medical profession, and thousands of graves in Colorado and New Mexico teatify as to its failure, while those in whose lings the destructive process has been checked, but not cured, remain in exile, hundreds of miles from the homes they long for, but dare not visit. There is scarcely a home in this broad land from which consumption has not taken told, and this very day thousands who believe themselves sound and well are harboring the deadly germs in their systems. "Only a cold," says the consumptive. "A stubbean case of bronchitis," says the doctor, drading to pronounce the word of existence, houghing the pronounce of the future, which are fated to be never realized, goes binded its way to be a special network and the pronounce of the future, which are fated to be never realized, goes binded its way to be a special network and the pronounce of the future, which are fated to be never realized, goes binded its way to be a special network and the pronounce of the future, which are fated to be never realized, goes binded its way to be a special network and the pronounce of the future, which are the fate of many a sufferer, and jubic the policy of the pronounce of the fate of the fate of many a sufferer, and jubic treatment in the infancy of the treatment has lifted by the Bensonizer treatment, in the infancy of the treatment of the men to the proposal of the pronounce of the many sufferer, and jubic treatment in the infancy of the treatment was insugurated, which were destined to a starrh and bronchitis. He bensonizer treatment, prepared with special fluids to fit his individual which varies with the tenteur encounce. padside, not knowing but their coming would be but to bid her a last farewell. To-day, April 5th, seventy days since she began using the Benconter, site is enjoying better health than she had since our marriage, six years six, is strong and bearing and weight fully ill pounds more than when she began using the Bencon; it is the time we sent in the question blank until she began to get under the influence of the treatment.

has tried for years all the medicines which medical science has found to combut consumption, and yet who acknowledges his faith and reliance in the Hensenizer treatment. He makes these statements because he has proved the value of the treatment, and his experience should mean much to any sufferer who content of the writers. Write us for treatment, and his experience should mean much to any sufferer who content of the writers. Write us for the manufacture of the patients whom it has rescued from the grave as its bey gramy was about to enfold them forever, and restored to the loving arms of their relatives and friends. They cannot say or do enough to show their gratitude, and their letters, written from hearts full of thankfulness and by breathe in every line the accents of truth and sincerity.

These GRATESTL SUFFERMS.

Read the following letter from a prominent professer of an Agricultural College in the south.

**Bessence for an Agricultural College in the south.

**Gentlemen—Four letter of some weeks ago has not been answered until now, for the reason that Mrs. H. has been visiting her mother in Meridian. She returned years and happiness into thousands of homes. The expression is often heard from patients. I would not take five laminy over the heart from patients. I would not take five laminy over the patient. Everyone in the stamp me mother to Meridian. She returned years and happiness into thousands of homes. The expression is often heard from patients. I would not take five laminy over the patient. Everyone in the stamp me years and delight when the course it when the proposed in the many line in the description of the place of the patient realizes himself the improvement in his condition.

The whole world over a det of the stamp put upon it by the constant from patients. I would not take five laminy uses it when the proposed in the little of the stamp put upon it by the constant and elected in the strain put upon it by the constant and ever design and constant and the places of the places of the place ment professor of an Agricultural College in the shouth "Benesoniaer Cen pany, St. Leuis, Mo.:

"Gentlemen—lour letter of some weeks ago has not been answered until now for the reason that Mrs. It has been visiting for at Artesia, the station where our branch road joins the main line, I had her stay on the scales in the waiting room. Imagine my surprise and delight when the beam tipped life pounds! She had on no eatra clothing but a light clocal. I think I respected her weight to you originally so Mr pounds are some contical that I feet it my daty to masses her mother and brothers to her bedside, not knowing but their consing would be but to hid her a last farewell. To-day, April St. seventy days since she had since our marvings, six years ago, is strong and bearty and weighs fully if pounds more than when she began using the Bensonizer, she is enjoying botter bealth than she had since our marvings, six years ago, is strong and bearty and weighs fully if pounds more than when she began using the Bensonizer of the treatment.

The whole world the patient realizes himself the improvement in his condition. The whole world owes a debt of gratitude to the identification of the literature of its power, and the world has observed the "White Flague" of its power, and the White Flague" of the power, and the whole world have an approve or marvings my antique to the White Flague" of the white Flague" of home. The expression is often heard from patients. I would not get another. Everyone in the family used of dillars in doctors him or over threat, and it has saved me hundred coloniars in doctors hims. What a remeity are dillars in doctors hims. What are threat never they have a remeity day or night to take up the work of healing and cleanswing the world from patients.

To-day, April St. seventy days since she had since our threat had a sevent with the literature and the improvement in his condition. The world had her which the White Flagues" of the White Flagues. It was not a sevent in the sounders of dillars in doctors hit

HOW MACHINE-MADE LAGE IS MANUFACTURED IN FRANCE

Investigations of United States Department of Commerce and Labor Show That This Industry Could Be Profitably Carried On in America-Germany, France, England and Switzerland Now Rivals for World's Trade.

machine prevails.

MACHINE'S FINGERS.

"In this machine a number of needles simultaneously trace or stitch a certain pattern upon a tightly stretched piece of cambric. This cambric is hung vertically in a movable frame, while on each side thereof are carriages containing two or three rows of needle holders, which alternately move horisontally to and from the framed cambric.

"By an apt arrangement machines for cambric embroidery are supplied with an appartus for boring or driving holes into the cambric around which the embroidering is then done; also for rounding these holes after completion of all attiches, and for adding to the embroidered pattern a decorative line of festioning. The borers' or 'stillettes' are four-edged, cone-shaped spears about 2 inches in length, corresponding in number and order to the needles in each bar, and so arranged upon another bar that they may be simultaneously moved forward and pressed through the cambric by a motion of the hand, the edges being sufficiently sharp to out the material to the extent desired.

"The rounders are ranged and operated exactly like the borers, being of the same size and number, but round and smooth, so as to accurately fit and round out the holes previously cut and embroidered.

"The festioning apparatus is also disposed upon a long har and consists of a line of hooks or projections so arranged as to catch the thread of each needle when desired, and, by giving a turn to the same, work a loose and shapely border around the finished embroidery.

"It may be added that these attachments can with equal facility be fitted to the

around the finished embroidery.

"It may be added that these attachments can with equal facility be fitted to the shuttle machine whenever embroidery or similar work is done upon those machines.

"The productive capacity of power-driven lace machinery being vastly in excess of that of hand-propelled machines, the power machine has long predominated in this district, and by it the bulk of the lace which reaches the world from this busy mart has been produced. True, it is claimed, and with much reason, that some of the very choicest products are still made upon the old-style hand machines, and that some such as the multicolored silk embroideries, can be successfully turned out upon none other; but the fact that from ten to twenty times the number of stitches can be accomplished upon ber of stitches can be accomplished upon a power machine in a given time, has long since rendered the latter dominant in the larger plants and for the production of staple wares.

staple wares.

"If it may be justly said that the hand machine produces a mere imitation of sewing by hand, it certainly is equally true that the shuttle machine is purely a multiplied sewing machine. Many points of similarity with the hand machine exists especially in the movable frame for the material upon which the needlework is done and the pantograph attachment. In this machine, however, two rows of single-pointed needles are fixed in a carriage on the side nearest the observer, which carriage drives the needles through the material stretched in the movable frame when they are met by an equal number of hobbin-filled shuttles playing in a fixed frame on the opposite side, thereby producing a lock stitch precisely like that made by the modern sewing-machine."

DEMANDS OF THE INDUSTRY.

Consul General Peters says that the embroidery and lace industry is one of the most important and profitable of the export industries of Ewitzeriani. It demands educated and intelligent workmen for the management of the embroidery machines, and many clever female helpers for the auxiliary machines and for the various processes through which the merchandise has to go before it is ready for export. The industry sends its products to all the civilized countries in the world. From a national economic point of view this industry is interesting and worthy of attention, because the cost of production consists principally in the workers wages and only in a secondary degree in the value of the materials and raw products DEMANDS OF THE INDUSTRY.

A MOSBY FLAG

Providence Man Inquires of Celebrated Confederate Leader Without Definite Result-Fine Silk Trophy Sewed by Hand.

REPUBLIC SPECIAL.

Providence, R. I. Dec. 2—Whether a Confederate flag he owns ever belonged to Mossy's guerrains, and how it came into the possession of the Providence man from whom he obtained it, are puzzling bliward Field, one of the prominent members of the Rhode Island Boclety, Sons of the American Revolution. Mr. Field has enleavored to obtain from Colonel John S. Moeby, now sump oyed in one of the Government departments at Washington, some information about the flag, and has received an answer which does not settle the question.

The flag is a handsome one, about thirty-two inches long and twenty-four inches wide, made of slik put together with greatest care. It is sewed by hand and by some good needlewoman, and must have been made in the early days of the war when supplies were still plentiful in the Confederacy, It is according to the official design, with three bars of red, white and blue, and the blue field with abite stars. REPUBLIC SPECIAL

white and blue, and the blue field with abite stars.

The fing was sent some years age to Charles Penlleton of this city, owner of a collection of antique furniture, which is now part of the collection of the Rhode Island School of Design. It was sent with another flag as shown by a letter found with it. The other flag, now missing, was the headquarters flag of one of the divisions of the Army of Northern Virginia, and had several shot holes and other sizes of war. The letter stated that the flag now owned by Mr. Fluid was made by Moshy's guerrillas and carried by that body.

Doctor Clifton F. Hodge's Unique

animals and birds.
"The boy may have made a pet of a wild puppy, and thus made a conquest of nature." he says. "The horse was the next animal to be domesticated, and here again it is most likely that the bey played a part, just as Alexander the Great tasked the flery Buorphalus, which no other could ride."

Doctor Clifton F. Hodge's Unique
Experiments in the Domestication of These Wild Birds.

Worcester, Mass., Dec. 2—For ever decent the turkey has held the record of being the bird most recently domesticated, but through the efforts of loctor Clifton F. Hodge of Clark University, another bird new lays claim to the distinction.

For nearly two years Doctor Hodge has been busy with the task of domesticating the partridge, or ruffed grouse, unlit he is now certain that they can be made tamer than the partridge of elightful pers.

The question of the commercial value of the domestication of the partridge does not concern Doctor Hodge hards in the woods adjoining chies.

The question of the commercial value of the domestication of the partridge does not concern Doctor Hodge at all. He rays not would tame him simply for ernamental purposes, and for the delight of hearing it from. "Isn't it about time," he asks." That we should learn game birds are more valuable for their sethed to be come vigorous, healthy birds, beautiful and thrilling whistle under the windows in the office of the partridge does not concern Doctor Hodge at all. He rays not would tame him simply for ernamental purposes, and for the delight of hearing it from. "Isn't it about time," he asks." That we should learn game birds are more valuable for their sethed to become vigorous, healthy birds, beautiful and thrilling whistle under the windows in the office of the bridge was as than a year to wake up in the morning and hear the quality whistle such heart the quality whistle under the windows. The content of the partridge does not concern Doctor Hodge at all. He rays not would make the word and the experiments that it is not one of the first day, and two were killed by cats. The other four warmy of us forego qual on to any of us forego

An Old, Respected and Well-Known Citizen Writes:

WM. A. LEWIN, M. D., Star Building, St. Louis.

I take this opportunity to thank you for having cured me of my Rupture. My family physician claimed that a surgical operation only could cure me. regretal operation only could cure me.

Thanks to your skill I am now a well
man; no more sign of my Rupture;
no more of the suffering I had to endure for so many years. This all you
accomplished without the use of the
knife and without giving me any pain.
Words can hardly express my gratitude for your kind consideration and
successful attention.

MENTY VENTEREDE Henry Venerlow

Thousands of similar letters are on file at my office for your inspection. For several months I have published, weekly, testimonials of cured patients counting in the hundreds. Can you still doubt my ability to cure Rupture? October 8th I published the names and addresses of nearly two hundred cured patients, taken at random from my books. Could I do so except I do as I promise: CURE RUPTURE TO STAY CURED?

I guarantee a permanent cure in every case of RUPTURE
